At The Case Lawyer, we strive to tackle your internet-related legal issues before they cause you trouble. We aim to prevent your legal issues wherever possible. However, if it comes down to court action, our experienced internet lawyers are prepared to defend you every step of the way.

At the Law Office of The Case Lawyer, we act as your Internet Lawyer. That phrase is sometimes met with confused looks – what exactly does an Internet Lawyer do? While a family lawyer in Islamabad will seek to advise your family based upon the statutes, the internet is without borders. An Internet Lawyer advises their client on how to comply with all laws that apply to the internet, which cover multiple jurisdictions and considerations.

When companies provide their services online to a global audience, such as via a Software as a Service model or through a mobile app, they are subject to the laws of every country in which they provide those services, and their consumers are based.

This is true even if the company has a Terms of Service page which states that only the courts of Pakistan shall have jurisdiction and

only Pakistani laws shall govern. When you deal with consumers, you can't waive the application of foreign consumer laws in the countries in which your services are available.

Our team of lawyers works with start-ups, e-commerce entrepreneurs, affiliates (marketers/networks), and businesses with an online presence who want to comply with state, federal, and international rules.

Our services include the following.

- Electronic Contracts & Internet Agreements
- Domain Name Disputes Resolution

OVERSEAS PAKISTANIS

Overseas Pakistanis are facing various problems in communicating to their lawyers in Pakistan regarding their family and property disputes and require an efficient and accessible platform for this purpose. Similarly, the law offices in Pakistan have no proper mechanism available to ensure the fair proceedings of the overseas Pakistanis.

The Case Lawyer, in collaboration with the Overseas Pakistanis community, developed a transparent mechanism for effective communication and to redress their litigation in an efficient manner.

The main reason behind setting up the online portal is to gain trust of our clients and assurance of trustworthy representation before the courts of law and to minimize the risk of financial loss. Moreover, it also facilitates the overseas clients to communicate with us so that we can present the actual grievance before the concerned authorities.

It is an online portal, allows overseas clients to register with us and we'll then arrange an online meeting and in case of further engagement, our client can track the status of their pending litigation. Through this mechanism, our clients are able to get informed by every move made in their case.

We are providing the following services to our overseas clients:

- Manage their family disputes.
- Child adoption matters.
- Child custody cases.
- Divorce & domestic violence.
- Child maintenance.
